

FLOCKIT

WATER CLARIFIER AND SEDIMENT CONTROL

BENEFITS

- Applicable to small to very large projects
- Easy to use
- Non-toxic to fish and aquatic life
- Tailor made to each application to achieve maximum results
- Used where no power or dosing equipment is available and suitable for remote applications

DESCRIPTION

Flockit is flocculent supplied in the form of a solid dissolving block, a granule or liquid.

Ideal applications for Flockit are:

- Clarification of site discharge water
- Clarification of ponds & dams
- Settling sediment fines in furrow irrigation to reduce erosion
- Clearing runoff water from stockyards & docks
- Clarification of drainage from construction sites
- Recycling of water used in drilling and laser boring
- Settling effluent from small industrial plants
- Treatment of underground mine sedimentation problems
- Underground water clarification for dewatering
- Cleaning concrete cutting sludge

APPLICATION

Flockit blocks are secured in the water flow/stream prior to settling ponds and discharge ponds. A 3kg Flockit block treats approximately 1,000,000 litres of 'dirty / turbid water'.

Flockit granules and liquid give other options for applications that may better suit the project.

HEALTH, SAFETY, ENVIRONMENT AND THE COMMUNITY (HSEC)

RST strives, through a process of continuous improvement, to fully integrate health, safety, environmental and community (HSEC) consciousness into all aspects of its activities.
