

RELEASE IT

BIO-RELEASE AGENT TO STOP “CARRY BACK”

BENEFITS

- Very cost effective due to low dosage rates
- Uniquely balanced formula provides excellent release characteristics
- Both water soluble and non water soluble formulations available
- Suitable for low, ambient and high working temperatures
- Completely biodegradable

DESCRIPTION

Release It is a uniquely balanced formulation of specialty non hazardous vegetable oil derivatives which is applied to the inside of truck trays, rail cars and machinery buckets to allow all the loaded material to slide away with ease.

Release It has been developed by RST as two formulations. One is diluted with water and the second as a non dissolving product which is applied directly to the particular surface without the addition of water. Release It will not damage equipment and is environmentally safe.

APPLICATION

When diluted with water at a 25% concentration, Release It is more easily applied through automatic spray systems where a large dosage of liquid per m² over large areas is required. The non water soluble formula is used when a more exact application process is used.

Release It (Water Soluble) - Dilute 1:5 with potable water and apply at a rate of 1 litre of solution per 10m² of surface area.

Release It (Non - Water Soluble) - Apply directly to the surface as a thin layer while achieving good blanket coverage at a rate of 1 litre per 50m² of surface area.

HEALTH, SAFETY, ENVIRONMENT AND THE COMMUNITY (HSEC)

RST strives, through a process of continuous improvement, to fully integrate health, safety, environmental and community (HSEC) consciousness into all aspects of its activities
