

RT9 HAUL ROAD DUST SUPPRESSANT

HAUL ROAD DUST SUPPRESSANT

BENEFITS

- Greatly reduces dust level and water usage
- Added at very low dosage rates into existing water carts
- Incorporated as part of a standard haul road watering program
- Improves the road running surface, reducing maintenance
- Reduces 'Roll Resistance' offering multiple savings
- Non-hazardous and eco-friendly

DESCRIPTION

RT9 is a unique blend of polymers and surfactants supplied as a viscous liquid that is simply diluted into water carts at very low dosage rates and sprayed onto haul roads as part of the standard haul road water procedure to;

- Improve water penetration
- Bind fine dust particles
- Consolidate haul road surfaces

APPLICATION

RT9 is added to the water cart at a dosage rate of 1:3000 using an RST automated dosing system. The product is applied on a continual basis to achieve water savings, dust reduction, improved road conditions and cost savings.

HAUL ROAD MANAGEMENT SYSTEM

To achieve the maximum results RST recommend that RT9 is applied as part of our onsite managed HRMS program combining;

- Tailor made dust suppression product – RT9 Haul Road Dust Suppressant
- Strategies
- Equipment modifications
- Training programs
- Monitoring and Reporting

HEALTH, SAFETY, ENVIRONMENT AND THE COMMUNITY (HSEC)

RST strives, through a process of continuous improvement, to fully integrate health, safety, environmental and community (HSEC) consciousness into all aspects of its activities
