

TOTAL GROUND CONTROL

DUST SUPPRESSANT – EROSION CONTROL – LONG TERM CRUSTING AGENT

BENEFITS

- Requires only one application
- Lasts for up to 18 months
- Easily applied through any watering system
- Simply dilutes with water
- Can be applied with seed and planting programs
- UV and rain tolerant

DESCRIPTION

TGC is a specialty polymer emulsion developed by RST as a long term crusting agent and veneer coat for all non trafficked applications. TGC is diluted in water and sprayed directly onto open ground material for long term results. TGC works on all material types.

Tests at the Newcastle University have proven TGC's effectiveness in withstanding winds over 100km strong. Main areas of application include;

- Stockpiles
- Tailings dams
- Broad acre areas
- Rail cars and truck loads
- All exposed materials

APPLICATION

TGC is diluted in water at a rate of between 2% - 3%. This solution is sprayed onto the treatment zone at a rate of 2 litres per m². In addition, TGC has numerous applications in the agricultural industry and can be sprayed directly over seeds, plants and trees.

TGC becomes fully effective upon drying.

HEALTH, SAFETY, ENVIRONMENT AND THE COMMUNITY (HSEC)

RST strives, through a process of continuous improvement, to fully integrate health, safety, environmental and community (HSEC) consciousness into all aspects of its activities
