

PENETRATOR NITRO PLUS

SOIL WETTER, NITROGEN, POLYSACCHARIDE & SEAWEED

BENEFITS

- Allows for faster water penetration
- Wets non-wetting soils
- Reduces water usage
- Promotes soil particle aggregation
- Retains soil moisture
- Reduces fertiliser leech
- Stimulates seed germination
- Stimulates fruit, plants and flowers growth
- Promotes soil biological activity
- Stimulates and increases root growth
- Reduces soil compaction and erosion
- Reduces 'turf wilting'

DESCRIPTION

Penetrator Nitro Plus contains all the unique properties of RST's Penetrator product with the added benefits of urea, polysaccharides and seaweed.

Soil wetting agents allow water to penetrate freely into soil, added nitrogen gives a greening spark to the plant or lawn. Polysaccharides stimulate biological activity adding micro life to the soil. Finally, concentrated seaweed improves root growth and improves the overall health of the vegetation.

APPLICATION

Penetrator Nitro Plus is added to the water being applied to the soil at the advised dilution rate using the standard watering practices.

General recommended dose is 10-15ml per 10L of water applied at 10-15ml per m².

HEALTH, SAFETY, ENVIRONMENT AND THE COMMUNITY (HSEC)

RST strives, through a process of continuous improvement, to fully integrate health, safety, environmental and community (HSEC) consciousness into all aspects of its activities
